

AQUATEC® *The* BELUGA

Simple pleasures of a bath, **Beluga** can make it happen. The battery-powered bathlift lowers into the tub and the back reclines for a relaxing soak. **Beluga** fits all standard home tubs.

Benefits

- Battery power for true portability and easy installation
- Back support reclines to 35°
- Use with or without covers
- Lifts 300 pounds
- Lowers to 2.5" from bottom of tub

Operation

The **Beluga** comes with charger and 12V gel cell battery. After an overnight charge, slip the battery on to the pin at the back of the unit. A fully charged battery will give 22 bath cycles. Built-in safety feature will not allow the lift to lower if there is not enough battery charge. A red light will glow on the hand control to tell you that the battery is low or out of charge. The lift lowers to 2.5" from the bottom of the tub and then the back reclines to 35°. You can stop the recline at any point and then return the back to the upright position. To rise out of the tub, the back returns to the upright position and the lift rises to the top of the tub. The seat side flaps will fully open for transfer off the seat. The reclining back separates from the seat for ease when cleaning or travel.

The BELUGA

AQUATEC® *The* BELUGA Accessories

Components

Beluga is constructed from fiber-reinforced plastic. **Beluga** comes with white seat and back covers, made from blown PVC. Or, sit directly on the non-slip patterned surface. Covers are removable and machine washable with a built-in bactericide. The floating hand control has push button for operation of lift and a warning lamp for low battery charge. Four large suction cups secure the lift to the floor of your tub. The lift is maintenance free and rust free. **Beluga** includes a 12V sealed battery and charger. There is no latex in the **Aquatec** bathlift covers or other components.

Accessories

- Height adapters
- Rotary seat with transfer board
- Carry Bag

Warranty

Beluga is warranted for 3 years excluding covers and battery.
