

Technical Data

Lift	Weight capacity	350 lbs
	Length	28.5"
	Width	13.2"
	Seat height up	17.1"
	Seat height down	2.8"
	Power input	14.4V DC nominal 7A max
	Duty cycle - intermittent	One bath per 15 mins
	Degree of protection	IP 66
Hand Control	Input	18V DC nominal 70mA
	Output	14.4V DC nominal 7A max
	Degree of protection	IP 67
Battery Charger	Input	8W 120V AC
	Output	17.4V DC nominal 70mA
Operating and Charging		
Temperatures	Max	140°F (60°C)
	Min	41°F (5°C)
Shipping and Storage		
Total Packed Weight	27.9lbs	Shipping volume 7.1ft ³
	Max	122°F (50°C)
	Min	14°F (-10°C)
Humidity	Max	90% RH
	Min	10% RH
Pressure	Max	18.4 psi
	Min	10.7 psi

This product is suitable for transport in pressurized aircraft holds

 bath lift

 **mountway**
 bringing independence to life

Taking a bath can be an enjoyable experience. The therapeutic benefits of soaking in warm water can relax muscles and ease joint tension, soothing away aches and pains. For those with limited mobility, getting in and out of the tub can sometimes present a problem. The Neptune bathlift from Mountway offers a practical bathing solution allowing the users to retain their independence by providing the ultimate in safety, comfort and reliability.

With over twenty years experience in designing and manufacturing bathlifts, Mountway believes its new, enhanced Neptune reflects the wealth of knowledge gained since 1982 through listening to your needs. Neptune's slimline, modern style has been designed to combine practicality and function to offer a compact, lightweight and portable bathlift.

Unrivaled Legroom

What makes the Neptune bathlift different is the amount of legroom it provides in the bath. The slimline design allows it to sit right back in the tub - ensuring that even the tallest people can enjoy a relaxing soak in warm water.

Compare the Neptune to any other bathlift and you'll find that it takes up less space in the tub. The bathlift allows more of your body to be submersed in the water because it goes lower than most.

Comfortable and Stylish

The length of the seat base and the legroom offered allows many bathers the opportunity to move down the bath to submerge more of their upper body.

The Neptune's contemporary design complements all bathrooms, whether traditional or modern. Its versatility means it fits almost any tub - even sunken and most corner tubs.

Lightweight

The lightweight Neptune is fully portable and is simple to take in and out of the tub. The seat can be instantly detached from the frame, making Neptune one of the easiest bathlifts to use when

it comes to moving, handling, and installing.

Safe & Simple

The Neptune's four strong suction feet allow the bathlift to remain stable during use. An easily rechargeable battery powers the motor, so there are no high voltages and no electrical installation to present a hazard.

Hygiene

The Neptune has been designed for effortless cleaning. The seat and the frame are easy to wipe clean and, because there is no integral padding, there is no risk of splitting.

Handset

The waterproof handset incorporates a large, easy-to-use rocker switch. This can be operated by fingertips, by the heel of the hand, or even an elbow. A battery status light indicates battery charge level.

Secure Fitting

The natural rubber suction feet fitted to the Neptune are larger and more flexible than others available. This gives the Neptune a secure fitting to curved surfaces, suiting most shapes and sizes of tub.

Side Flaps

The strong, wide side flaps facilitate transfer on and off the seat. The contoured shape offers protection for the user during the raising and lowering of the Neptune.

Accessories

Carry bags for the professional home care giver or traveller are available and extended side flaps for wide tubs can be ordered.

Unrivalled Comfort & Style
